## Professional Experience

### Software Engineering Intern

Kevy, May 2016 - July 2016; Atlanta, Georgia  
Development is done in Ruby on Rails and EmberJS. In addition to full stack development, I worked with Elasticsearch.

- Built and shipped a new analytics dashboard.
- Built and shipped a custom workflow editor.

### Freelance Consultant & Web Developer

August 2012 - Present; Atlanta, Georgia  
Worked with small businesses to create and maintain a modern web presence.

- Designed and developed websites using current coding standards in HTML, CSS, JavaScript and PHP.
- Created database backends to track inventory,
- Improved SEO and administered social media platforms

### Freelance Event Filmmaking

June 2011 - August 2015; Atlanta, Georgia  
Worked with clients to capture and create films which helped to promote future events.

- Communicated with clients to understand their vision
- Filmed, edited, and produced films to promote and share events, products, and services

## Education

- Purdue University; West Lafayette, IN  
B.S. in Computer Science, Class of 2019
- The Lovett School; Atlanta, GA  
Class of 2015

## Relevant Coursework

- Foundations of Computer Science, Object-Oriented Programming, C Programming

## Leadership

Purdue Undergraduate Student Board  
Spring '16 - Present

- Director of Public Relations
- USB has created a help room to serve over 200 students, started the first student-run course taken by over 400 students this year, and Purdue's intercollegiate hackathon, Boilermake

## Projects

### YEP

- Developed a analytics platform at my first hackathon using javascript to help consumers make accurate decisions when visiting businesses or buying products

### PhyCalc

- Created a iOS physics calculator during my senior year of high school to help with homework and to study for tests

## Skills

Languages: Ruby on Rails, EmberJS, Java, C, HTML & CSS, Javascript & JQuery
